Description

The LIP-ME201 BACnet/IP Router connects a BACnet MS/TP channel to a BACnet/IP network. It routes BACnet packets back and forth through an IP based network, such as a LAN (Ethernet), an Intranet, or even the Internet.

The LIP-ME201 is compliant with the standards ASHRAE 135-2004 and ISO 16484-5. LIP-ME201 can be configured to act as a BACnet Broadcast Management Device (BBMD).

The L-IP connects to the IP network via a 100baseT Ethernet channel. The complete LIP-ME201 configuration can be performed through the built-in Web server using a standard Web browser.
